## XI.3 Quantiles de la loi du $\chi^2$

Soit  $X_n$  une v.a. de loi  $\chi^2(n)$ , on pose

$$\int_x^{\infty} \frac{1}{2^{n/2} \Gamma(n/2)} y^{\frac{n}{2}-1} e^{-y/2} dy = \mathbb{P}(X_n \ge x) = \alpha.$$
